

Muhammad Muzammil Safdar

Full Stack Developer

03144878266 | Lahore, Pakistan | mmuzammilsafdar3@gmail.com | [Portfolio](#) | [Linkedin](#) | [Github](#)

Summary

Dedicated Full Stack Software Engineer with 2 years of hands-on experience specializing in the MERN stack (MongoDB, Express, React/Next.js, Node.js) and TypeScript. Experienced in building scalable, high-performance web applications with a strong focus on responsive, user-friendly interfaces. Strong ability to collaborate with cross-functional teams, optimize application performance, and deliver smooth, high-quality digital solutions.

Skills

- **Frontend:** SCSS, Tailwind CSS, Javascript, Typescript, React JS, Next JS, Redux
- **Backend:** Node.js, Express.js, Socket.IO
- **Database:** MongoDB, PostgreSQL, Redis, Firebase, Supabase
- **Cloud & Hosting:** AWS (EC2, S3, Amplify), Vercel, Netlify, VPS, Nginx, Git, Github
- **Payment & Media:** Stripe, Cloudinary

Professional Experience

Axtra Studios

Associate Software Engineer (Onsite)

Oct 2024 - Present

- Gained hands-on experience in React, Next.js, Node.js, Express.js, MongoDB, and SQL for full-stack development.
- Developed and optimized RESTful APIs for efficient data exchange.
- Implemented Server-Side Rendering (SSR) and Static Site Generation (SSG) in Next.js. Managed state, component lifecycles, and data fetching effectively.
- Worked on **secure authentication** and **role-based access control** for user management.
- Performed **database operations** using **MongoDB and SQL**.
- Applied best practices for **performance optimization** and **API integration**.
- Designed and developed **responsive UI** for a seamless user experience.

Client Onboarding Platform

Tech Stack: Next JS, MongoDB, Tailwind, Typescript, Node, Stripe, Socket IO

- Secure user authentication with role-based access control
- Team onboarding via email invites with verification and role assignments (e.g., Developer, Designer, PM)
- Comprehensive project management with task groups (milestones), status tracking, and real-time dashboards
- Template system to convert projects into reusable templates and vice versa.
- Integrated surveys for collecting feedback from clients and developers
- Real-time notifications powered by webhooks for seamless collaboration
- Stripe-powered billing for subscriptions and payments
- Responsive design optimized for all devices and screen sizes

Truck Insurance Lead

Tech Stack: Next JS, MongoDB, Tailwind, Typescript, Node, Stripe

- Secure user authentication and Google OAuth for seamless social login
- Flexible subscription and billing management via Stripe
- Advanced multi-parameter search using MongoDB aggregation
- Search results with pagination and Excel export functionality
- Responsive design optimized for all screen sizes and devices

Urban DTF

Tech Stack: Next JS, Tailwind, Typescript, Node JS, Stripe, Socket IO, PostgreSQL, Prisma

- Role-based system with Admin, Staff, and Customer panels
- Customers can upload design sheets, make payments, and track orders in real time
- Design files are securely stored using Google Drive API
- Integrated chatbot for customer queries and a ticket/case system for support
- Notification system for order updates and quality control status

Tree Post

Tech Stack: Next JS, Tailwind, Typescript

- Built a responsive landing website UI for a tree service platform connecting homeowners and Contractors
- Designed sections for job upload, instant quote flow, testimonials, and FAQs with a modern layout
- Focused on user-friendly navigation and visual presentation for service comparison and trust-building

Devmate Solution

Full Stack Developer (Remote)

Aug 2025 - Jan 2026

- Developed expertise in creating responsive, mobile-friendly UIs for enhanced user experience.
- Improved skills in API integration, state management, and secure data handling in web applications.
- Worked on a CRM system handling wholesale sales, inventory management, and financial reporting.
- Strengthened understanding of full-stack deployment across multiple cloud platforms (Azure, GCP, Railway).

KL Fashion

Tech Stack: Next JS, MongoDB, Tailwind, Typescript, Node, Stripe, Socket IO, Railway

- Built a CRM system to manage wholesale sales easily.
- Added inventory tracking to keep track of stock and product availability.
- Created financial reports like income statements and sales summaries.
- Made real-time dashboards to monitor sales, stock, and revenue.

Personal Projects

Ecommerce Website

Tech Stack: Next JS, MongoDB, Tailwind, Typescript, Node

- Secure authentication & role-based permissions for managing users & platform functionalities.
- Users can easily select products to purchase & save items for later with add-to-cart and wishlist functionality.
- Interactive engagement through product ratings, reviews, and user feedback.
- The browsing experience is streamlined with pagination, sorting, and filtering, making it easy to find the right products quickly.
- Full CRUD operations for inventory, order tracking, and user management.
- Adaptive UI ensuring smooth usability across all devices.

Education

Bachelor of Computer Science

2020 - 2024

Virtual university
